[Flash Player 10.1 For Mobile Blackberry Download](#)

The Evolution of Media and Communication Delivery on the Flash Platform		
Traditional Streaming / Communication with Unicast model	RTMFP in Flash player 10.0 / Stratus 1.0	RTMFP in Flash player 10.1 / Stratus 2.0
Traditional streaming requires a client to receive all data from a centralized server cluster. Scale is achieved by adding more servers	First generation of RTMFP in Flash player 10.0 supported rendezvous. Media was always sourced from the publishing peer.	Second generation of RTMFP supporting groups in Flash player 10.1 supports application-level multicast and reduces the load on the source publisher.
